

Mayan symbol
for
Galactic Center (Hunab Ku)

In 1988 three conjunctions * of **Saturn** and **Uranus** set in motion a 45 year cycle of relationship linking the two of them. The last of those conjunctions occurred exactly at the zodiacal position of Galactic Center in late Sagittarius, thereby calling our attention to all things Sagittarian and of the mind: our philosophies, our religions, our sciences, our models of education, our worldviews.

A conjunction at Galactic Center also directs our attention to the cosmic wisdom of the Maya who place the Galactic Center at the very core of their cosmology. They honor it as the One Giver of Movement and Measure and refer to it as Hunab Ku.

On August 17, 1987, only months prior to the Saturn/Uranus conjunction, the worldwide ceremony known as **Harmonic Convergence** dramatically announced the prophetic return of the spirit of Feathered Serpent, foremost Mayan mythological image of the peaceful creation of cosmically aligned culture.

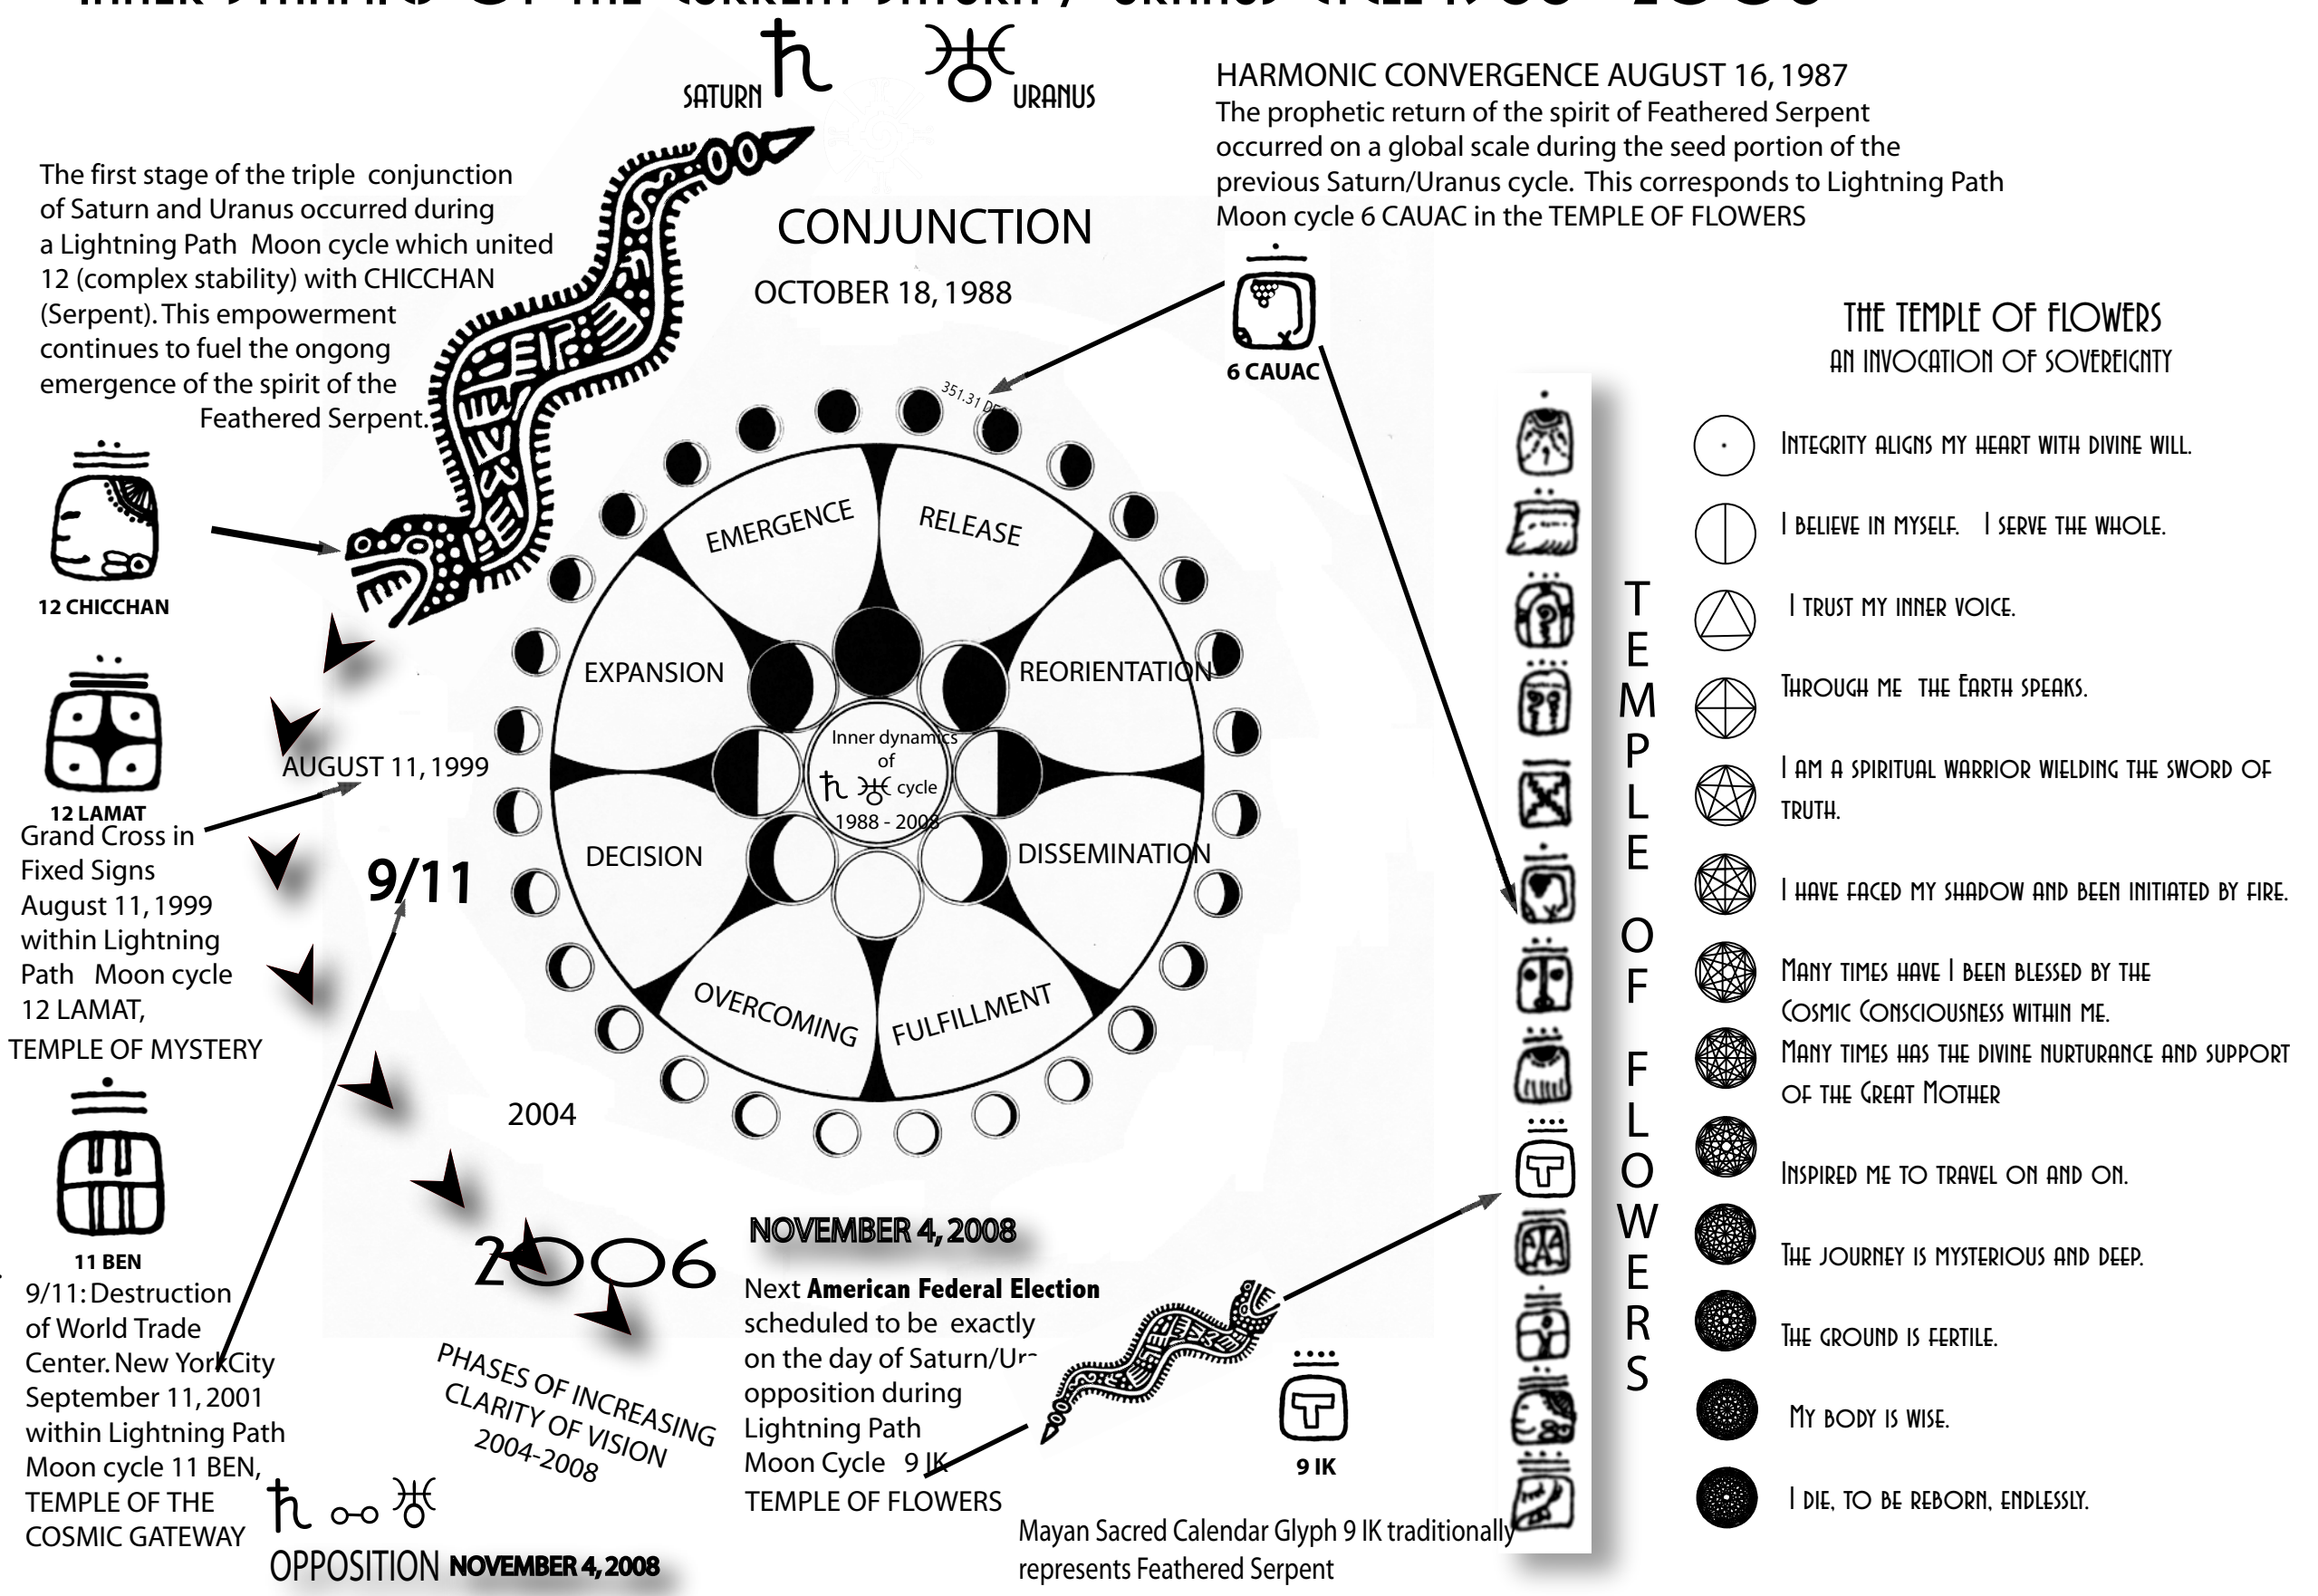

It is our premise that people who resonate to the universal values inherent in the term harmonic convergence constitute the roots, stem and leaves of an emerging “flower of consciousness” reaching toward fulfilment in alignment with the currently unfolding Saturn/Uranus cycle. Empowered by values universal to all humanity the destiny of this harmonic convergence seed group is to facilitate peaceful, revolutionary transformation (Uranus) of the status quo (Saturn) through actions guided by conscious attunement to cosmic order.

Meaningful mythological guidelines related to this unfoldment are encoded in the **Harmonic Module**, a contemporary derivation of the Mayan Sacred Calendar. The Lightning Path reveals previously hidden aspects of that Sacred Calendar by integrating the Harmonic Module with contemporary astrological practices.

* The zodiacal positions of each of the three conjunctions beginning the cycle were as follows:
Feb. 12, 1988: Sagittarius 29 degrees 55 minutes, Jun. 26, 1988: Sagittarius 28 degrees 47 minutes,
Oct. 18, 1988: Sagittarius 27 degrees 49 minutes, placing the latter conjunction exactly at the zodiacal position of Galactic Center.

INNER DYNAMICS OF THE CURRENT SATURN / URANUS CYCLE 1988 - 2008

“Any opposition can be approached in two ways or stages: from the point of view of unbridgeable differences leading to confrontation, or in terms of a separation that exists for the purpose of providing a foundation for a new level of relatedness to develop--whether this relatedness is between persons, between a person and society, between two facets of a personality or two areas of a person’s life.” Quoted from **Astrological Aspects: A Process Oriented Approach** by Dane Rudyhar and Leyla Rael
